A history of delivering quality.

The Agro Delta Groep comprises 4 subsidiaries on operating sites in Zwijndrecht and Dordrecht and has over 60 years of experience in the storage, transshipment and handling of (organic) feedstuffs, grains, seeds, pulses, rice and fertilizers in bulk and break bulk. The different operating companies hold the necessary certificates such as ISPS, GMP+, USDA-NOP and SKAL.

The supply and delivery of goods takes place via coasters, barges, trucks and containers. Around 650,000 tonnes, originating from Europe, the US, South America and Asia, are handled each year.

Apart from these activities the Agro Delta Groep leases logistic property such as premises, warehouses and offices at 6 locations in Zwijndrecht and Dordrecht to third parties.

Thinking ahead of space and time.

24 employees take care of a reliable and efficient planning, loading and unloading and the required treatment or conditioning of the handled goods. Staff turnover at the Agro Delta Groep is low which has resulted in employees having valuable experience and knowledge of the business. The Agro Delta Groep is an independent storage and transshipment company with short lines which enables prompt follow up to requested services and available capacity. The different companies of the Agro Delta Groep are not active in the trade of the products stored.
